

A BLUEPRINT FOR SUCCESS

It has been said, that if the whole race would at an agreed moment, scuff their feet, the planet would actually slow down. Ah, yes, causing a change in the moon, the tides and many earthly dynamics.

Of course, my real topic is not physics...but it is about what can happen when -

-- ambitious ideas are conceived

when, -- plans are meticulously and well laid

and what, -- unity and hardwork can achieve.

We all know the achievements of the past 20 months or so were no accident. We were not touched by a wave of a wand. No witchcraft was left to chance. And no one scuffed the wrong way.

We had a plan.

We had a set of goals.
