RE: PRODUCT MONITORING RESULTS

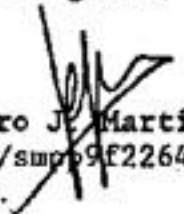

Enclosed you will find our monitoring results on your LUCKY STRIKE, VICEROY KSSC, VICEROY Lights and KOOL received here in June.

Please note that the tar and nicotine targets need to be revised to reflect the ISO method. We recommend the following targets:

	Tar	Nic.
LUCKY STRIKE 80 mm Box	15.0 mg	1.0 mg
KOOL 80 mm Box	15.0 mg	1.0 mg
VICEROY KSSC	15.0 mg	1.0 mg
VICEROY Lights 80 mm Box	13.0 mg	0.8 mg

It was also noted that the blend alkaloid of LUCKY STRIKE, VICEROY and VICEROY Lights increased significantly. We are not aware of any blend changes and will appreciate any explanation that you may provide.

Best regards,

Pedro J. Martinez
