

THE COUNCIL FOR TOBACCO RESEARCH - U.S.A.

February 25, 1970

TO: Dr. Arthur Furst

FROM: V.F.L.

SUBJECT: Recommendation for additional supportive equipment for contract activities at Mason Research Institute.

Attached find copy of letter 2-18-70 from Dr. R. D. Carpenter of Philip Morris to Dr. M. Senkus of Reynolds.

I agree whole heartedly with Dr. Carpenter's recommendation.

Secondly, after discussions with Dr. Rosencrans of M.R.I. I find that they do not have an adequate recorder for the I.R. analyzer. Therefore an additional \$2,000.00 would be required for the purchase of a reliable x y recorder.

This procedure would be used for all the smoking machines being tested by M.R.I. before and during animal exposures.

Total amount to be requested not less than \$4,500.00.

V.F.L.
