TO: Dr. Brian Lawrence
Mr. Roger Faircloth
Mr. Dick Wolfe
Mr. Mark Miller
Ms. Renee Pogrow

REFERENCE: Cocoa

Consolidated Cocoa

Per telephone conversation with Dick Wolfe today, he advises the test batch of Consolidated Cocoa without the flow agent has been run and the reports state the material was satisfactory. Please advise if I can have Consolidated ship for the balance of 1991 Cocoa without N-zorbit.

Cocoa Barry

The test run of Cocoa Barry's new nitrogen process without flow agent was reported to have run satisfactorily. Cocoa Barry has just shipped in a truckload of the new nitrogen process with flow agent. Please advise as soon as possible if this runs satisfactorily as we have some of their trucks on hold. If this is okay, I will advise them to bring in all future material with nitrogen process without N-zorbit.

Gerkins Cocoa

I understand from Dick that the test material from Gerkins has been debagged and placed into totes. Please advise how this runs in Manufacturing and we will discuss at our quarterly flavoring meeting.
