**Subject:** Mustang Incident

May-

John Knight hit a deer last night with the Mustang on his way home from the event. The deer struck his front/driver side fender, producing a small dent. It sounds like the fender will have to be replaced and therefore will not be available until repaired or replaced. I'm calling Greg as as soon as complete this e-mail to see if we can get another vehicle in market. I will keep you posted on any replacement and/or repair details and forward the Field Incident Report as soon as it comes in.

Thank you,  
Mario
