G. R. DI MARCO

RJR INTEROFFICE MEMORANDUM

SUBJECT: Exercise and Cancer

FROM: Sam Simmons

TO: Dr. G. R. Di Marco

DATE: July 24, 1987

As you are aware, I have long contended that exercise should ameliorate lung cancer due to its affect on lung clearance. This study (attached) has demonstrated an exercise amelioration of colorectal cancer.

We have contacted the authors and they have taken lung cancer data on the same group of subjects. I would like permission to set up a contract to have them look at lung cancer and exercise.

*Told Sam to  
see Leungers - if they  
have no problem - will  
approve.*
